

Tim Hogg has been selected as our April 2004 Employee of the Month. Tim has been employed since September 9, 1985, and currently works in our Engineering Department.

His nominator notes, “During the past year, Tim has provided more than 100% effort and participation in the development of the GIS program – which in turn has provided other departments and township committees with maps that are timely and easy to work with, thereby making the work of others within the Township environment easier.

Tim has been unfailingly polite and helpful, no matter how short the notice. As someone who routinely asks Tim for maps, etc on very short notice, I greatly appreciate his willingness to help. He is a pleasure to work with.”

It is with great pleasure that we present Tim Hogg of the Engineering Department with our April 2004 Employee of the Month award.

CONGRATULATIONS, Tim!
